PROFILE SUMMARY

I am fresher in node.js backend developer but I am able to create Restfull and perform operations and I have knowledge about node.js backend.

WORK EXPERIENCE

Restaurant Management System Backend Development

- Technologies :-

  Node.js, Express.js, MongoDB , Mongoose , ORM, JWT, RESTful API, Postman

- Description of the project :-

  Developed the backend for a Restaurant Management System to handle various functionalities such as order management, table reservations, and inventory control.

  - Designed and implemented RESTful APIs for handling customer orders, table reservations, and menu management.

  - Integrated JWT-based authentication for secure user login and session management.

  - Created and managed database schemas using MySQL and MongoDB for storing customer and order data.
